The programs in philosophy are designed to develop skill in philosophical analysis, to enable the student to think clearly, systematically, and independently on philosophical issues, and to achieve a thorough acquaintance with major classics and contemporary works in philosophy. Philosophy classes are conducted so that students may develop philosophical skills by class discussions and by the writing of carefully directed papers.

The following is an outline of the main features of the graduate program. For full details, please write the Department of Philosophy directly.

**GRADUATE DEGREES**

The graduate program in philosophy is primarily a doctoral program. Admission as a graduate student normally implies that, in the opinion of the department, the student is a promising candidate for the Ph.D.
degree. The Master of Arts degree, however, may be awarded to students in the program who meet the requirements specified below.

The application process for admission and financial aid for all graduate programs in the Division of the Humanities is administered through the divisional Office of the Dean of Students. The Application for Admission and Financial Aid, with instructions, deadlines and department specific information is available online at: http://humanities.uchicago.edu/students/admissions (http://humanities.uchicago.edu/students/admissions/).

Questions about admissions and aid should be directed to humanitiesadmissions@uchicago.edu or (773) 702-1552.

International students must provide evidence of English proficiency by submitting scores from either the Test of English as a Foreign Language (TOEFL) or the International English Language Testing System (IELTS). Current minimum scores, etc., are provided with the application. For more information, please see the Office of International Affairs website at https://internationalaffairs.uchicago.edu, or call them at (773) 702-7752.

Students admitted to doctoral study are typically awarded a five-year fellowship package that includes full tuition, academic year stipends, summer stipends, and medical insurance. Teaching training is a vital part of the educational experience at the University, so all fellowships include a required teaching component.

THE DEGREE OF MASTER OF ARTS

The objective of the program is the Ph.D. degree. Students seeking a master's degree should apply to the Master of Arts Program in the Humanities (MAPH), a three-quarter program of interdisciplinary study in a number of areas of interest to students. Further details about the MAPH program are available at http://maph.uchicago.edu/

Doctoral students who are enrolled in a Ph.D. program at the University of Chicago may receive an M.A. in Philosophy. These can be either:

- Doctoral students in another discipline who seek a “secondary” M.A. in Philosophy, in conjunction with their doctoral studies in that other discipline; or
- Doctoral students in Philosophy who want to receive the M.A.

The requirements for the degree are the same in either case. The requirements can be satisfied entirely by course-work; no thesis is required. They are specified in five clauses:

- Quality: No course for which the student received a grade lower than a B+ will satisfy any requirement for the M.A.
- Level: Only courses taken at the graduate level (that is, with a course-number of 30000 or higher) can satisfy any requirement for the M.A.
- Quantity: The student must complete at least eight courses in Philosophy at the University of Chicago. (Reading and research courses do not count toward satisfying this requirement, nor do courses taken pass/fail—except the first-year seminar, which counts as one course if passed.)
- Distribution: The student must have taken at least one designated course in each of the Philosophy Department's five “areas” — namely:
  - Area I: Value theory
  - Area II: Philosophy of science, philosophy of language, and logic
  - Area III: Epistemology and metaphysics
  - Area IV: Ancient or Medieval philosophy
  - Area V: Modern philosophy (17th-19th centuries)
- Elementary Logic: The student must demonstrate competence in elementary logic. This can be achieved by an interview in which the candidate satisfies one of the Department's logicians that he or she has the required competence, or by taking the Elementary Logic course (PHIL 30000 Elementary Logic), or any more advanced logic course offered by the Department. Philosophy 30000 can count as one of the minimum eight courses, but it does not satisfy the Area II requirement. A more advanced logic class does both.

APPLICATION PROCEDURE

Doctoral Students in the Department of Philosophy may apply for the M.A. at any time after they have completed the requirements. 1. Contact the Department Coordinator so that the proper paperwork is submitted verifying your courses (above) and 2. contact the office of the Humanities Dean of Students in order to gain access to the degree application in http://my.uchicago.edu. Keep your expected graduation date set to the date you anticipate receiving the Ph.D.

Students in a Ph.D. program at the University of Chicago in a department other than Philosophy who wish to receive a “secondary” M.A. in Philosophy must first apply for admission to the M.A. program in the department of Philosophy. No student can apply unless she has taken at least three Philosophy courses, and it is expected that the student will apply soon after completing that number of courses. To initiate the application
process, the student should set up an appointment with the Assistant Dean of Students for Admissions in the Division of Humanities who will direct the student through the required paperwork and obtain:

- The applicant’s transcript of courses taken for the B.A.
- His/Her GRE scores
- A transcript of the applicant’s courses at the University of Chicago taken up to the time of the application.
- A sample of her best philosophical writing. This may but need not be a paper written for one of the applicant’s already completed Philosophy courses at the University.
- A brief letter from the chair or director of graduate studies of the applicant’s home department supporting the application. The letter should explain why the student is seeking an M.A. in philosophy to complement her doctoral studies.
- Names of two faculty in the Dept. of Philosophy who can comment on work done by the applicant and on her philosophical potential.
- A statement by the applicant that explains why she is seeking an M.A. in Philosophy.

The Degree of Doctor of Philosophy

The divisional and University requirements for the Ph.D. degree must be fulfilled. Departmental requirements are as follows:

Course Requirements

The Course Requirement has seven parts concerning:

- The number of required courses
- The distribution of required courses
- The logic requirement
- Required progress
- Policies concerning incompletes
- Grades
- Transfer credits

Number of Required Courses

Students must complete at least thirteen courses in their first two years of study: the first year seminar and twelve graduate courses.

First-year students must enroll in the first-year seminar. The exact organization and scheduling varies from year to year according to the instructor’s discretion. It is graded on a pass-fail basis.

In addition, twelve graduate courses must be completed with a grade of B or better:

- At least ten of these courses must be in the Philosophy Department listings;
- Reading and research courses do not count among these twelve classes
- At least one must be a graduate seminar in Philosophy

DISTRIBUTION OF REQUIRED COURSES

Students are required to take one course in each of the following three areas of contemporary philosophy:

- Value theory (listed in the course descriptions as I)
- Philosophy of science, philosophy of language, and logic (listed in the course descriptions as II)
- Epistemology and metaphysics (listed in the course descriptions as III)

and three courses on the history of philosophy as follows:

- A figure or movement in either Ancient or Medieval Philosophy (listed in the course descriptions as IV)
- A figure or movement in Modern Philosophy from the 17th through 19th centuries (listed in the course descriptions as V)
- One additional course on a figure or movement in either IV or V.

It should be noted that not all graduate courses satisfy a field distribution requirement; those not classified in the published course descriptions as belonging to I-V cannot be used to satisfy the distribution requirement. Nor can Philosophy 30000 (Elementary Logic) be used to satisfy a field distribution requirement.

Logic Requirement

There is a requirement in logic that can be satisfied in several ways.
• By passing PHIL 30000 Elementary Logic with a grade of B or higher. Philosophy 30000 is offered every Autumn quarter. It counts toward the twelve course requirement but does not satisfy the field II distribution requirement.

• By passing a course equivalent to or better than Philosophy 30000 (Elementary Logic), at another institution or in another department at Chicago, with a grade of B+ or higher. The equivalence of the course in question to Philosophy 30000 will be determined by the instructor in Philosophy 30000 in the year in question, on the basis of an interview with the student, and such evidence as the syllabus for the course, the textbook for the course, and any other course materials which the student can provide. Note that satisfying the logic requirement in this way will count neither towards one of the twelve required courses nor towards satisfying the field II distribution requirement.

• By passing an advanced graduate course in logic with a grade of B or higher. Passing an advanced graduate course in logic would both satisfy the logic requirement and count towards the field II distribution requirement.

REQUIRED PROGRESS
Courses must be completed, with a grade of B or better, according to the following timetable.

• Two courses should be completed by the beginning of the Winter quarter of the first year
• Four courses (at least three in the Philosophy Department) should be completed by the beginning of the third quarter
• Six courses should be completed by 30 September of the second year
• Ten courses should be completed by the end of the fifth quarter
• All thirteen courses (twelve plus the first year seminar) must be completed by 30 September following the sixth quarter.

In addition to this timetable, students should keep in mind that because they are expected to be working on their Preliminary Essay over the summer following their sixth quarter, they would be ill-advised not to have completed their course requirements by the early part of the summer.

INCOMPLETES
At the discretion of the instructor, coursework not completed on time may be regarded as an “incomplete.” This means that the instructor will permit a student to complete the work for a course after the normal deadline.

The instructor sets the time period for completion of the incomplete, subject to the following limitation: all coursework must be submitted by September 30th following the quarter in which the course was taken in order to count toward fulfillment of the requirements for the M.A. and Ph.D. This date is an absolute deadline and is not subject to further extensions by individual faculty members.

Note: Students in their first year in the program are not permitted to take any incompletes in their first quarter.

GRADES
Satisfactory grades for work toward the Ph.D. in Philosophy are A, A-, B+, and B.

For Philosophy faculty, those grades mean the following. A: pass with distinction; A-: high pass; B+: pass; B: low pass.

TRANSFER CREDITS
The following policy applies to the Philosophy Ph.D. program. Special requirements of joint programs take precedence over this policy.

1. Of the required 12 graduate courses, no more than 2 can be taken at the University, but outside the Philosophy Department.
2. Of the required 12 graduate courses, no more than 3 can be transferred from other institutions.
3. Of the required 12 graduate courses, at least 9 must be taken within the Philosophy Department's course offerings.
4. Only courses taken while enrolled in a doctoral program in Philosophy can be counted towards the required 12 graduate courses.

For example, a student might transfer 2 courses from another institution and take one course from another department within the University, with the remaining 9 courses taken within the Philosophy Department. Or a student might transfer 3 courses from another institution, with the remaining 9 courses taken within the Philosophy Department.

Students wishing to obtain credit for graduate courses taken from the listings of other departments within the University toward the required 12 course do not need to petition the department, within the two-course limit specified above.
Students wishing to obtain transfer credit for courses taken at other institutions must petition the Graduate Program Committee. Students should be prepared to provide evidence in support of their transfer application at the request of the Committee. Such evidence may include course descriptions, syllabi, assignments, written work completed for the course, and so on. Students who are transferring from other graduate programs must make such a request upon their entry into the Philosophy Department. Students who take a course at another institution while enrolled in the PhD program should consult with the Director of Graduate Studies beforehand, but must still petition the Graduate Program Committee to have the course accepted for transfer credit upon completion of the course.

Note that elementary logic courses taken outside the department may fulfill the elementary logic requirement but may not be used to meet the 12 course requirement. See “Logic Requirement” above for further details.

**Foreign Language Exam**

All students must pass an examination in French, German, Latin, or Greek by the end of Spring quarter of the fourth year or before the topical examination, whichever comes first. (There is a special rule for students who wish to write theses on ancient Greek or Roman philosophy; this is detailed below).

There are two kinds of language examinations: those administered by the Department and those administered by the University. Departmental language exams will be given twice a year and may not be taken more than twice.

Students who take the University language examination must receive a “High Pass.” These are offered every quarter and there is a fee for taking them.

There is a special requirement for those working in ancient philosophy or German philosophy, since work in these fields depends heavily on one's ability to use the relevant languages.

Any student intending to write a thesis on ancient philosophy must pass the Departmental or University exam in Greek (the latter with a “High Pass”). Any student intending to write a thesis on Hellenistic or Roman philosophy must also pass the Departmental or University exam in Latin (the latter with a “High Pass”). Any student intending to write a thesis on German philosophy must pass the Departmental or University exam in German with a ‘High Pass’.

Such students may take the Departmental exam in Greek or Latin or German a maximum of three times (as opposed to two times, which is the rule for other languages).

**Preliminary Essay**

In the Spring quarter of their second year students will register for the first quarter of a two-quarter (Spring, Autumn) workshop on the preliminary essay. The workshop involves discussion of general issues in writing the essay and student presentations of their work. Although students do not register for the Summer quarter, they are expected to make significant progress on their preliminary essay over the summer.

By the end of the eighth week of the Spring quarter at the latest each student will submit to the Director of Graduate Studies a proposed topic and a ranked list of possible readers in the Philosophy Department. The Graduate Program Committee will evaluate proposed topics along the following lines:

- Is the topic philosophically interesting?
- Can a paper on the topic be completed within the given time?
- Can a committee be formed to supervise an essay on the topic?

If the topic is approved, the Graduate Program Committee will form a preliminary essay committee for the student in question consisting of two faculty readers, each of whom the student is expected to consult regularly and each of whom have equal responsibility in directing the preliminary essay. The student’s primary responsibility in this process is regularly to provide each of the faculty readers with a new draft of the essay and then rewrite the most recent draft in accordance with their instructions. The primary responsibility of the faculty readers is to provide the student with prompt and focused instructions about how to rewrite each draft, while ensuring that it remain within the page-length requirement. The preliminary essay should be no longer than 8,000 words in the body of the text, with an additional 1000 words of philosophical prose permitted in the footnotes. The word-count does not include bibliographical and philological footnotes or block quotations in the text.

In addition to the supervision furnished by the student's preliminary essay committee, further direction and structure is provided through participation in the Preliminary Essay Seminar, which runs for two quarters. Every student enrolled in the PhD program is required to take the Preliminary Essay Seminar for credit during the Spring Quarter of their second year and the Fall Quarter of their third year. The seminar is taught by the Director of Graduate Studies, who offers additional supervision and oversight throughout the entire preliminary essay process, from beginning to end. One of the primary purposes of the Preliminary Essay Seminar is to provide a forum in which students can present their ongoing work on the essay in a seminar-environment, in order to discuss it with their peers and receive additional oral feedback on their work.
From the point of view of the faculty, the aim of the exercise of the preliminary essay is to enable the student to acquire the following two skills before embarking upon a full-scale dissertation: (1) to learn to improve a piece of philosophical prose by subjecting it to many rounds of revision, without in the process permitting it to grow in length, and (2) to learn to work with a committee of faculty advisors whose distinct forms of supervision are to be synthesized and harmonized in that single piece of writing. From the point of view of the student, the exercise of the preliminary essay affords the following two opportunities: (1) to test out a possible dissertation topic, without having immediately to make a costly investment of time and effort in it, and (2) to test out a pair of possible dissertation advisors, without immediately having to commit to these individuals as final choices for members of the student's dissertation committee. If, after completing the preliminary essay, a student wishes to change (one or more of) their faculty advisors or their topic or both, then they are utterly free to do so.

The final draft of the Preliminary Essay must be submitted by the first day of the Winter quarter of the student's third year. Essays submitted late are penalized as follows: A letter grade is reduced by one notch if the essay is submitted after the deadline but before the first day of the sixth week of the Winter quarter (e.g. an 'A' is reduced to an 'A-'). A letter grade is reduced by two notches if the essay is submitted after the first day of the sixth week of the Winter quarter but by the end of Exam Week of the Winter quarter (e.g. an 'A' is reduced to a B+). Essays submitted after the end of the Winter quarter do not count toward satisfaction of the requirement.

**TOPICAL EXAMINATION**

Following the Preliminary Essay, students begin work toward their dissertations. During the Winter and Spring quarters of their third year, they should be meeting with various faculty members to discuss and refine possible dissertation topics, and possible dissertation committees.

By the end of the seventh week of the spring quarter, each student should meet with a prospective committee for an informal 'dissertation chat,' based on a 'dissertation sketch' submitted to those faculty and to the Graduate Program Committee. The character of that sketch will vary from case to case; but, in any case, is not expected to be long or elaborate. Some sketches may be more definitive than others; some may be seriously disjunctive; some students may submit more than one sketch. The point of the sketch and preliminary meetings is to provide some faculty guidance for the more independent research that begins over the summer. After the 'dissertation chat' the student should submit to their committee a document that describes the work toward formulating a dissertation project and lays out a plan of research for the summer that will lead to a 'Topical Examination' by the beginning of the Winter quarter of their fourth year.

At the beginning of the following fall (fourth year), students will again meet with their advisors (optimally all together), to discuss progress and developments over the summer, and make concrete plans for the Topical Examination (to be held later that quarter, or, if necessary, early in the Winter quarter). Those plans will include:

- a tentative timetable
- a determination of the dissertation committee
- the expected character of the materials to be submitted by the student, on which the Examination will be based.

Though the details will vary (depending on the subject matter, the state of the research, individual work habits, and so on), these materials must include a substantial piece of new written work by the student (something on the order of twenty-five double-spaced pages) -- perhaps a draft of a chapter, an exposition of a central argument, a detailed abstract (or outline) of the whole dissertation, or whatever the committee as a whole agrees upon. (It is expected that students will abide by these agreements; but, if there are unanticipated problems, they may petition their advisors and the DGS, in writing, for a revision).

The Topical Examination is an oral examination administered by the members of a student's dissertation committee with the aim of evaluating the viability of the proposed dissertation project and the student's ability to complete it within a reasonable amount of time. Students will be admitted to candidacy for the Ph.D. only once they have officially passed their Topical Examination.

Note: students must have scheduled their Topical Examination by the end of their fifteenth quarter (normally the end of the fifth year) to remain in the Program. (For students admitted before 2010: students must have scheduled their Topical Examination by the end of their sixth year to remain in the Program.)

Students cannot take their Topical until they have met all other program requirements including passing their foreign language exam or exams. Students must finish their language exams by the end of their fourth year in the program (independently of their status with regard to any other requirements). The Department’s normal expectation is that students will have advanced to candidacy (including passing their Topical Examination and their language examination(s)) by the end of third week of their 11th quarter (normally the Winter quarter of their fourth year). Summer funding at the end of the fourth year is contingent on satisfying this expectation.

The Department requires that each student submit a written progress report on his or her progress by the end of the winter quarter of each year, beginning with his or her fourth year in the program. The report should be submitted to the Director of Graduate Studies and (after the Topical) to the student's dissertation committee. In addition to this report, students who have advanced to candidacy must submit a substantial piece of new writing.
The departmental teaching obligation is as follows: it must be consistent with timely progress toward the doctoral degree. Accordingly, the policy on teaching beyond the doctoral degree. Teaching preparation is a crucial aspect of that responsibility and any additional teaching students in the program are encouraged to do more teaching in the later years.

The Department views the teaching obligation as a bare minimum with regard to teaching preparation. Doctoral to ensure that students in the program acquire a certain minimum degree of teaching competence. However, the obligation is a requirement of the Department of Philosophy's Ph.D. program.

These first four teaching opportunities are built into the basic requirements of the Ph.D. program in order to ensure that students in the program acquire a certain minimum degree of teaching competence. However, the Department views the teaching obligation as a bare minimum with regard to teaching preparation. Doctoral students in the program are encouraged to do more teaching in the later years.

The Department’s primary responsibility with respect to doctoral students is to support their work toward the doctoral degree. Teaching preparation is a crucial aspect of that responsibility and any additional teaching must be consistent with timely progress toward the doctoral degree. Accordingly, the policy on teaching beyond the departmental teaching obligation is as follows:

1. In Years 1 & 2, when doctoral students are expected to satisfy their course and logic requirements as well as to formulate topics, find readers, and begin research toward their Preliminary Essays, doctoral students are not given departmental teaching and will not be permitted to accept extra-departmental teaching. The students may, however, complete the Training Course for Writing Interns and Lectors offered by the University of Chicago Writing Program before Autumn of Year 3.

2. In Years 3-5, students may petition the DGS for permission to apply for extra teaching. If, and only if, the following conditions are met, the Department (normally through the DGS) may petition the Dean of Students in the Humanities and the Master of the Humanities Collegiate Division to allow the student to apply for extra-departmental teaching:
   a. The student is making exemplary progress toward the degree in Philosophy (that is, the student has met every deadline set in the time to degree expectations and the students' work toward the degree is strong).
   b. There is a sound pedagogic reason to allow the student to seek extra teaching.
3. Students must make their petitions to the DGS by the second week of the term prior to the term in which they hope for extra-GAI teaching—students must make their petitions by the second week of Spring quarter for extra teaching in Autumn, by the second week of Autumn quarter for extra teaching in Winter, and by the second week in Winter quarter for extra teaching in Spring. The Department must make its petition to the DOS and Master of the HCD by the end of the third week of the term prior to the term in which students seek extra-GAI teaching.

4. If the DOS and the HCD approve the Department’s petition, and if the students are offered extra teaching appointments, funding for these positions cannot be drawn from the students’ fellowship teaching obligation monies.

5. Extra teaching permissions may be withdrawn if students cease to make exemplary progress toward their degrees.

Petitions to the DOS and Master of the HCD will attest to the students’ progress and provide the rationale for allowing these students to seek teaching beyond the departmental teaching obligation.

Students do not need departmental permission to seek extra teaching assignments after their fifth year of residence.

Over the course of a doctoral student’s career, that student together with the Department builds a teaching dossier, containing the syllabuses of the courses that she has taught, written reports by faculty teaching mentors on those courses, and last but not least, undergraduate evaluations of those courses. When doctoral students prepare to go on the job market, the Department sees to it that one member of the faculty undertakes the responsibility of writing a teaching letter for the student that documents and surveys the highlights of her teaching career at the University of Chicago.

The Department of Philosophy offers a non-credit and not required Pedagogy Program for PhD students. For more information, click here (http://philosophy.uchicago.edu/graduate/pedagogy.html).

Dissertation and Final Oral Exam

Students must inform their committee members of their intention to schedule a defense during the term PRIOR to the term in which they plan to defend. Committee members will consult concerning whether the dissertation is in sufficiently final form to warrant the fixing of a date for the oral examination. Committee members will normally have seen the bulk of the work of the dissertation before making this judgment. Students should consult with their Dissertation Director and other Committee members about the amount of material they will need to see, the state of completion needed, and the time required for this judgment to be made. When the Dissertation Committee judges that the student is ready to defend, the student must coordinate with the Dissertation Committee and the Department Co-ordinator to settle the date and time for the dissertation.

Students should consult with their Committee concerning a precise deadline for submission of the final draft of the dissertation for the defense. This is normally several weeks to a month before the defense date. Students should be aware that, in practice, in order to graduate in a given quarter, the final draft of the dissertation must be submitted to the Dissertation Committee in the first week or two of that quarter, so that the defense can take place prior to the Library’s deadline for submitting the final form of the dissertation, leaving time for any necessary revisions noted during the defense. For information regarding the precise deadline by which your approved dissertation must be submitted in a given quarter for the degree to be granted in that same quarter, please click here (http://www.lib.uchicago.edu/e/phd/deadlines.html). Note also that an exam cannot be scheduled for at least two weeks after the formal request has been submitted.

The defense must take place at the University of Chicago, preferably in the Autumn, Winter, or Spring quarters. Summer defenses are scheduled at the discretion of the student’s Dissertation Committee.

The student and at least one member of the Dissertation Committee must be physically present at the defense.

The student should submit, within the timeline notes, to the Department Coordinator:

- the scheduled date, time, and the members of the committee, and any special room requirements, at least 3 weeks prior, or as soon as the date and time are settled
- an electronic copy (.doc or .docx) of a 1-2 paragraph abstract, at least 3 weeks prior
- an electronic copy of a 10-page abstract of the dissertation, at least 2 weeks prior

The final oral exam is a public event. The examining committee consists of the members of the dissertation committee, along with an appointed member of the Humanities Division faculty who serves as a representative of the Dean’s Office. Other faculty and graduate students from the Philosophy Department may and generally do attend. Family members of the doctoral candidate and other members of the general public are also welcome.

If a student passes, then it is customary in the final phase of the exam for the members of the student’s dissertation committee to request a final round of revisions to the dissertation. The final granting of the degree is conditional upon the completion of these final revisions. These are to be made promptly after the exam and prior
to the formal submission of the PhD document. After the dissertation is submitted, the student is required to provide each member of the dissertation committee with an electronic version of the document in its final form.

**PHILOSOPHY COURSES**

**PHIL 30000. Elementary Logic. 100 Units.**
An introduction to the concepts and principles of symbolic logic. We learn the syntax and semantics of truth-functional and first-order quantificational logic, and apply the resultant conceptual framework to the analysis of valid and invalid arguments, the structure of formal languages, and logical relations among sentences of ordinary discourse. Occasionally we will venture into topics in philosophy of language and philosophical logic, but our primary focus is on acquiring a facility with symbolic logic as such.
Instructor(s): G. Schultheis Terms Offered: Autumn
Equivalent Course(s): CHSS 33500, HIPS 20700, PHIL 20100

**PHIL 30116. American Pragmatism. 100 Units.**
This course is a first introduction to American Pragmatism. We will examine some of the seminal philosophical works of the three most prominent figures in this tradition: Charles Sanders Peirce, William James, and John Dewey. Our main aim will be to extract from these writings the central ideas and principles which give shape to pragmatism as a coherent alternative to the two main schools of modern philosophical thought, empiricism and rationalism. (B) (III)
Instructor(s): A. Vasudevan Terms Offered: Autumn
Equivalent Course(s): PHIL 20116

**PHIL 30210. Kant’s Ethics. 100 Units.**
In this course we will read, write, and think about Kant’s ethics. After giving careful attention to the arguments in the Second Critique, portions of the Third Critique, the Groundwork of the Metaphysics of Morals, the Metaphysics of Morals, and several other primary texts, we will conclude by working through some contemporary neo-Kantian moral philosophy, paying close attention to work by Christine Korsgaard, David Velleman, Stephen Engstrom, and others. (A) (I)
Instructor(s): C. Vogler Terms Offered: Autumn
Equivalent Course(s): PHIL 20210, FNDL 20210

**PHIL 30506. Philosophy of History: Narrative & Explanation. 100 Units.**
This lecture-discussion course will focus on the nature of historical explanation and the role of narrative in providing an understanding of historical events. Among the authors discussed are Edward Gibbon, Immanuel Kant, R. G. Collingwood, Leopold von Ranke, Lord Acton, Fernand Braudel, Carl Gustav Hempel, Arthur Danto, and Hayden White. (III)
Instructor(s): R. Richards Terms Offered: Winter
Equivalent Course(s): PHIL 20506, HIPS 25110, CHSS 35110, HIST 35110, HIST 25110, KNOW 31401

**PHIL 30926. Wonder, Wonders, and Knowing. 100 Units.**
In wonder is the beginning of philosophy,’ wrote Aristotle; Descartes also thought that those deficient in wonder were also deficient in knowledge. But the relationship between wonder and inquiry has always been an ambivalent one: too much wonder stupefies rather than stimulates investigation, according to Descartes; Aristotle explicitly excluded wonders as objects of inquiry from natural philosophy. Since the sixteenth century, scientists and scholars have both cultivated and repudiated the passion of wonder; ON the one hand, marvels (or even just anomalies) threaten to subvert the human and natural orders; on the other, the wonder they ignite fuels inquiry into their causes. Wonder is also a passion tinged with the numinous, and miracles have long stood for the inexplicable in religious contexts. This seminar will explore the long, vexed relationship between wonder, knowledge, and belief in the history of philosophy, science, and religion.
Instructor(s): Lorraine Daston Terms Offered: Spring. Course to be taught Spring 2020
Prerequisite(s): Reading knowledge of at least one language besides English, some background in intellectual history. Consent is required for both grads and undergrads. This course will be taught the first five weeks of the quarter.
Equivalent Course(s): KNOW 30926, SCTR 30926, CHSS 30936, HIST 25318, HIST 35318
PHIL 31002. Human Rights: Philosophical Foundations. 100 Units.
Human rights are claims of justice that hold merely in virtue of our shared humanity. In this course we will explore philosophical theories of this elementary and crucial form of justice. Among topics to be considered are the role that dignity and humanity play in grounding such rights, their relation to political and economic institutions, and the distinction between duties of justice and claims of charity or humanitarian aid. Finally we will consider the application of such theories to concrete, problematic and pressing problems, such as global poverty, torture and genocide. (A) (I)
Instructor(s): B. Laurence Terms Offered: Spring
Equivalent Course(s): INRE 31602, HIST 39319, HMRT 21002, MAPH 42002, PHIL 21002, HMRT 31002, LLSO 21002, HIST 29319

PHIL 31108. Time After Physics. 100 Units.
This course provides a historical survey of the philosophy of time. We begin with the problems of change, being and becoming as formulated in Ancient Greece by Parmenides and Zeno, and Aristotle's attempted resolution in the Physics by providing the first formal theory of time. The course then follows theories of time through developments in physics and philosophy up to the present day. Along the way we will take in Descartes' theory of continuous creation, Newton's Absolute Time, Leibniz's and Mach's relational theories, Russell's relational theory, Broad's growing block, Whitehead's epochal theory, McTaggart's A, B and C theories, Prior's tense logic, Belnap's branching time, Einstein's relativity theory and theories of quantum gravity. (B) (II)
Instructor(s): T. Pashby Terms Offered: Autumn
Equivalent Course(s): KNOW 21108, KNOW 31108, PHIL 21108, HIPS 21108, CHSS 31108

PHIL 31214. The Philosophy of Art. 100 Units.
This course is an introduction to the philosophy of aesthetics, with a focus on art and art objects. With respect to art, our questions will include: What is art? What is the point of making art? What is it to appreciate art? (Does discursive knowledge (of the technique, the history of the painting or its subjects, the artist's life, etc.) help or hinder this appreciation?) What is the metaphysical character of art objects (symphonies, paintings, novels, etc.)? What is the ethical status of art? (Were Plato's ethical suspicions about art warranted?) With respect to aesthetics more generally, our questions will include: is beauty in the eye of the beholder? (What is it for something to be in the eye of the beholder?) Does beauty track (or even constitute) scientific truth? If so: why? If not, why have so many mathematicians, physicists, and biologists been preoccupied with the beauty of their theories?
Instructor(s): B. Callard Terms Offered: Winter
Equivalent Course(s): PHIL 21214

PHIL 31414. MAPH Core Course: Contemporary Analytic Philosophy. 100 Units.
This course is designed to provide MAPH students with an introduction to some recent and ongoing debates between philosophers working in the analytic tradition. The course is, however, neither a history nor an overview of analytic philosophy. Instead, we will focus on three different debates, spending about three weeks on each, with topics selected from the general areas of epistemology, metaphysics, and ethics.
Instructor(s): M. Kremer Terms Offered: Autumn
Prerequisite(s): This course is open only to MAPH students. MAPH students who wish to apply to Ph.D. programs in philosophy are strongly urged to take this course.
Equivalent Course(s): MAPH 31414

PHIL 31509. Practical Rationality. 100 Units.
Humans are said to be rational animals. What does rationality, understood as a capacity, consist in? And what is practical rationality, understood as a qualified way of thinking, feeling, and acting? - In this course we are going to consider a roughly Aristotelian framework for answering these and related questions. The place of reason in human nature is characterized by a complex teleology: its employment is both purpose and instrument. To make use of reason is, centrally, to infer, i.e. to think and act for reasons. The roles of reasons are various: they validate, justify, prompt and guide, explain … To act on a reason is, typically, to do something for the sake of some end. This is so, in particular, in the context of more or less technical reasoning. But the most basic and ultimate reasons, the ones by heeding which we act justly or unjustly and, more generally, well or badly, seem not to be of this form. How then do they enter the constitution of a good human life?
Instructor(s): A. Mueller; C. Vogler Terms Offered: Spring
Equivalent Course(s): PHIL 21509

PHIL 31609. Medical Ethics: Central Topics. 100 Units.
Decisions about medical treatment, medical research, and medical policy often have profound moral implications. Taught by a philosopher, two physicians, and a medical lawyer, this course will examine such issues as paternalism, autonomy, assisted suicide, kidney markets, abortion, and research ethics. (A)
Instructor(s): D. Brudney; Staff Terms Offered: Winter
Prerequisite(s): Third or fourth year standing. This course does not meet requirements for the Biological Sciences major.
Note(s): Philosophy majors: this course fulfills the practical philosophy (A) requirement.
Equivalent Course(s): HIPS 21609, BIOS 29314, PHIL 21609, HLTH 21609, BPRO 22612
PHIL 31720. Aristotle’s Nicomachean Ethics. 100 Units.
This course is a study of the Nicomachean Ethics, Aristotle’s most widely read philosophical treatise on the best life for human beings. In it he offers enduringly relevant answers to question such as: What is happiness? How can studying ethics promote happiness? What is the relationship between being happy and being morally good? What features are characteristic of the morally good person? What role does friendship play in the happy life? What about goods like honor, health, pleasure, and money? To what extent do we have control over our actions, character, and happiness? What level of intellectual activity is required for happiness? To what extent can one engage in such activity without being morally good? (A) (IV)
Instructor(s): B. Reece Terms Offered: Winter
Prerequisite(s): Undergraduates who are not Philosophy majors or Fundamentals majors should seek instructor permission to enroll.
Equivalent Course(s): PHIL 21720, FNDL 21908

PHIL 31722. Thomas Aquinas’s Commentary on Aristotle’s Nicomachean Ethics. 100 Units.
We will read through and discuss the commentary, looking at it both as an interpretation of the Ethics and as a philosophical work in its own right. (A) (IV)
Instructor(s): S. Brock Terms Offered: Spring
Prerequisite(s): For the undergraduates, those who are not Philosophy or Fundamentals majors should seek permission to enroll.
Equivalent Course(s): PHIL 21722, FNDL 21722

PHIL 31723. The Will: Aristotle, Augustine, Aquinas. 100 Units.
Aristotle’s approach to ethics is sometimes termed intellectualist, meaning that it has no room for a notion of the will, understood as a principle of human action distinct from intellect or reason. Such a notion, it is said, gained currency only centuries later, at least partly through influences alien to Greek philosophy. St Augustine is often cited as one of the thinkers most responsible for the notion’s becoming prevalent. St Thomas Aquinas, however, presents a highly articulated theory of human action that appears to integrate a robust conception of the will, and one heavily indebted to Augustine, into a largely Aristotelian framework. We will read and discuss substantial passages from these three authors bearing on the question of the will, in the hope that seeing them side by side can help to get at what they really mean and what the philosophical merits of their views are. (A) (IV)
Instructor(s): S. Brock Terms Offered: Autumn
Prerequisite(s): Undergraduates should either be Philosophy majors or obtain the consent of the Professor.
Equivalent Course(s): PHIL 21723

PHIL 32401. Modern Logic and the Structure of Knowledge. 100 Units.
In this course, we will examine the various ways in which the concepts and techniques of modern mathematical logic can be utilized to investigate the structure of knowledge. Many of the most well-known results of mathematical logic, such as the incompleteness theorems of Gödel and the Löwenheim-Skolem theorem, illustrate the fundamental limitations of formal systems of logic to fully capture the structure of the semantic models in which truth and validity are assessed. Some philosophers have argued that these results have profound epistemological implications, for instance, that they can be used to ground skeptical claims to the effect that there must be truths that logic and mathematics are powerless to prove. One of the aims of this course is to assess the legitimacy of these epistemological claims. In addition, we will explore the extent to which the central results of mathematical logic can be extended so as to apply to systems of inductive logic, and examine what forms of inductive skepticism may emerge as a result. We will, for example, discuss the epistemological implications of Putnam’s diagonalization argument, which shows that, for any Bayesian theory of confirmation based on a definable prior, there must exist hypotheses which, if true, can never be confirmed. (B) (II)
Instructor(s): K. Davey; A. Vasudevan Terms Offered: Winter
Equivalent Course(s): PHIL 22401

PHIL 32709. Introduction to Philosophy of Quantum Mechanics. 100 Units.
In this class we examine some of the conceptual problems associated with quantum mechanics. We will critically discuss some common interpretations of quantum mechanics, such as the Copenhagen interpretation, the many-worlds interpretation and Bohmian mechanics. We will also examine some implications of results in the foundations of quantum theory concerning non-locality, contextuality and realism. (B) (II)
Instructor(s): T. Pashby Terms Offered: Spring
Prerequisite(s): Prior knowledge of quantum mechanics is not required since we begin with an introduction to the formalism. Only familiarity with high school geometry is presupposed but expect to be introduced to other mathematical tools as needed.
Equivalent Course(s): KNOW 22709, PHIL 22709, CHSS 32709, HIPS 22709
PHIL 32961. Social Epistemology. 100 Units.
Traditionally, epistemologists have concerned themselves with the individual: What should I believe? What am I in a position to know? How should my beliefs guide my decision-making? But we can also ask each of these questions about groups. What should we -- the jury, the committee, the scientific community--believe? What can we know? How should our beliefs guide our decision-making? These are some of the questions of social epistemology. Social epistemology also deals with the social dimensions of individual opinion: How should I respond to disagreement with my peers? When should I defer to majority opinion? Are there distinctively epistemic forms of oppression and injustice? If so, what are they like and how might we try to combat them? This class is a broad introduction to social epistemology. (B)
Instructor(s): G. Schultheis Terms Offered: Winter
Equivalent Course(s): PHIL 22961

PHIL 34109. John McDowell’s Mind and World. 100 Units.
This course will be an overview and introduction of some of the main themes of the Philosophy of John McDowell, orientated around his book Mind and Word. We will also read some of his writings on philosophy of perception and disjunctivism dating from before the book, as well as some of his later responses to critics of the book. The course will conclude with a brief glance at the subsequent development of his views, especially in philosophy of perception since Mind and Word. (B) (III)
Instructor(s): J. Conant Terms Offered: Spring
Prerequisite(s): One previous course in philosophy.

PHIL 34266. Habit, Skill and Virtue. 100 Units.
(I)
Instructor(s): M. Haase Terms Offered: Winter
Equivalent Course(s): PHIL 24266

PHIL 34267. Iris Murdoch. 100 Units.
In this course we’ll read through philosophical work by Iris Murdoch spanning her whole career, along with several of her novels. Topics covered will include: Murdoch’s criticism of the moral and practical philosophy of her time; her encounter with the work of Sartre and the existentialists; her engagement with the dialogues of Plato; her later work in moral psychology; and her discussions of aesthetics and the relation between art and philosophy. Primary philosophical readings will be taken from the collection ‘Existentialists and Mystics’, and her last work ‘Metaphysics as a Guide to Morals’.
Instructor(s): Amos Browne Terms Offered: Winter
Note(s): This class is primarily intended for students in the MAPH program; undergraduates in their 3rd and 4th year will be admitted with instructor consent, based on the number of available places in the class.
Equivalent Course(s): MAPH 34266, PHIL 24267

PHIL 34799. Same-Sex Sexuality: History, Philosophy, and Law. 100 Units.
This new course examines two important historical periods in Western thought during which same-sex conduct and attraction were extensively debated, both politically and philosophically: ancient Greece and Rome, and Victorian and post-Victorian Britain. We will examine the evidence for ancient Greek and Roman attitudes and practices and the normative arguments of the philosophers, especially Plato and the Greek Stoics. Then we leap forward to Victorian Britain, where a newly honest reading of the Greek evidence provided gay men with a rallying point against Christian laws (female same-sex acts were never illegal in Britain), and philosopher Jeremy Bentham provided eloquent arguments for the decriminalization of same-sex acts (fully published only in 2013). We then pause to study a literature that questions whether sexual orientation is a timeless category or a cultural artifact, and a related debate about alleged biological accounts of same-sex desire. Then we move on to the Wolfenden Commission Report of 1957 that recommended the decriminalization of same-sex acts in Britain (with the case of Alan Turing as a central example of what troubled the reformers), along with the related legal-philosophical debate between H. L. A. Hart and Lord Devlin debate (and its roots in the earlier debate about liberty between J. S. Mill and FitzJames Stephen).
Instructor(s): M. Nussbaum Terms Offered: Spring
Prerequisite(s): Undergraduates may enroll only with the permission of the instructor. Graduate students (Ph.D. and MA) do not need permission. Assessment is by an 8 hour take home final exam, although Ph.D. students and law students may select a paper option.
Equivalent Course(s): GNSE 24799, PLSC 34799, PLSC 24799, CLAS 34719, RETH 34799, GNSE 34799, CLCV 24719, PHIL 24799

PHIL 35707. The Different Senses of Being. 100 Units.
Aristotle states that ‘being is said in many ways,’ we shall seek to understand this statement and to study the history of its interpretations. Among the modern authors we shall discuss are Franz Brentano, Martin Heidegger, Ernst Tugendhat, Charles Kahn, Aryeh Kosman, G.E.L. Owen, Stephen Menn, David Charles.
Instructor(s): Irad Kimhi Terms Offered: Winter. This course will be taught winter quarter 2020
Prerequisite(s): Undergrads by permission of instructor only.
Note(s): Graduate seminar open to advanced undergrads
Equivalent Course(s): SCTH 35706
PHIL 37322. Jerusalem and Athens - On the Conflict between Revelation and Philosophy. 100 Units.
I shall discuss the subject on the basis of 4 lectures Leo Strauss gave on 'Jerusalem and Athens' and 'Reason and Revelation' in the period 1946-1967.
Instructor(s): Heinrich Meier
Terms Offered: Spring
Note(s): Open to undergrads by consent only. This course will be taught the first five weeks of the quarter.
Equivalent Course(s): SCTH 37322, FNDL 27322, PLSC 37322

PHIL 37500. Kant: Critique of Pure Reason. 100 Units.
This will be a careful reading of what is widely regarded as the greatest work of modern philosophy, Immanuel Kant's Critique of Pure Reason. Our principal aims will be to understand the problems Kant seeks to address and the significance of his famous doctrine of 'transcendental idealism'. Topics will include: the role of mind in the constitution of experience; the nature of space and time; the relation between self-knowledge and knowledge of objects; how causal claims can be justified by experience; whether free will is possible; the relation between appearance and reality; the possibility of metaphysics. (B) (V)
Instructor(s): M. Boyle
Terms Offered: Autumn
Equivalent Course(s): PHIL 27500, HIPS 25001, FNDL 27800, CHSS 37901

PHIL 38203. Hegel's Philosophy of Right. 100 Units.
TBD
Instructor(s): M. Haase
Terms Offered: Spring

PHIL 39425. Logic for Philosophy. 100 Units.
Key contemporary debates in the philosophical literature often rely on formal tools and techniques that go beyond the material taught in an introductory logic class. A robust understanding of these debates—and, accordingly, the ability to meaningfully engage with a good deal of contemporary philosophy—requires a basic grasp of extensions of standard logic such as modal logic, multi-valued logic, and supervaluations, as well as an appreciation of the key philosophical virtues and vices of these extensions. The goal of this course is to provide students with the required logic literacy. While some basic metalogical results will come into view as the quarter proceeds, the course will primarily focus on the scope (and, perhaps, the limits) of logic as an important tool for philosophical theorizing. (B)
Instructor(s): M. Willer
Terms Offered: Winter
Prerequisite(s): Elementary Logic or equivalent. Open for Graduates but no field credit.
Equivalent Course(s): PHIL 29425

PHIL 39600. Intermediate Logic. 100 Units.
This course provides a first introduction to mathematical logic. In this course we will prove the soundness and completeness of deductive systems for both propositional and first-order predicate logic. (B) (II)
Instructor(s): A. Vasudevan
Terms Offered: Winter
Prerequisite(s): Elementary Logic (PHIL 20100) or its equivalent.
Equivalent Course(s): PHIL 29400, CHSS 33600, HIPS 20500

PHIL 40120. The Philosophical Investigations. 100 Units.
A close reading of Wittgenstein's Philosophical Investigations. Topics include: meaning, explanation, understanding, inference, sensation, imagination, intentionality, and the nature of philosophy. Supplementary readings will be drawn from other later writings. (III)
Instructor(s): J. Bridges
Terms Offered: Winter

PHIL 42961. Social Epistemology. 100 Units.
This course will introduce some main themes of Social Epistemology, that is the study of knowledge in relation to social institutions and relationships. The course will focus on four topics: epistemic authority; testimony as a source of knowledge; peer disagreement and epistemic conflict; and epistemic justice and injustice. (III)
Instructor(s): M. Kremer
Terms Offered: Winter
Note(s): The course is exploratory: the instructor is relatively new to this field and will be learning the material with the students.

PHIL 49701. Topical Workshop. 100 Units.
This is a workshop for 3rd year philosophy graduate students, in which students prepare and workshop materials for their Topical Exam.
Instructor(s): K. Davey
Terms Offered: Autumn
Prerequisite(s): A two-quarter (Autumn, Winter) workshop for all and only philosophy graduate students in the relevant years.

PHIL 49702. Revision Workshop. 100 Units.
This is a workshop for 2nd year philosophy graduate students, in which students revise a piece of work to satisfy the PhD program requirements.
Instructor(s): K. Davey
Terms Offered: Spring
Prerequisite(s): All and only philosophy graduate students in the relevant years.
PHIL 49900. Reading & Research. 100 Units.
Reading and Research.
Instructor(s): Staff Terms Offered: Autumn Spring Winter
Prerequisite(s): Consent of Instructor.

PHIL 50100. First-Year Seminar. 100 Units.
This course meets in Autumn and Winter quarters.
Instructor(s): D. Finkelstein Terms Offered: Autumn Winter
Prerequisite(s): Enrollment limited to first-year graduate students.

PHIL 50114. Wittgenstein’s Tractatus. 100 Units.
This course will provide a close reading of Wittgenstein’s only published book. We will place the Tractatus in the context of Frege and Russell’s logical works, examining Wittgenstein’s debts to and critique of his predecessors. We will explore both the overall strategy of the book and the contemporary debate about how to read its mysterious, seemingly self-undermining conclusion, and the details of his views (e.g. the ‘picture theory’ of language, the context principle and meaning, the nature of logic, the general form of proposition, the accounts of mathematics, science, and ethics). We will close with a brief discussion of Wittgenstein’s later philosophy in relation to the Tractatus. Secondary literature will include selections from Ramsey, Ryle, Anscome, Geach, Hacker, Conant, Diamond, Goldfarb, Kremer, Ricketts, and Sullivan. (II)
Instructor(s): M. Kremer Terms Offered: Autumn

PHIL 51200. Workshop: Law and Philosophy. 50 Units.
Substantial Writing Requirement. The theme for 2019-20 is ‘Migration and Citizenship.’ This is a seminar/workshop many of whose participants are faculty from various related disciplines. It admits approximately ten students. Its aim is to study, each year, a topic that arises in both philosophy and the law and to ask how bringing the two fields together may yield mutual illumination. Most sessions are led by visiting speakers, from either outside institutions or our own faculty, who circulate their papers in advance. The session consists of a brief introduction by the speaker, followed by initial questioning by the two faculty coordinators, followed by general discussion, in which students are given priority. Several sessions involve students only, and are led by the instructors. Students write a 20-25 page seminar paper at the end of the year. The course satisfies the Law School
Instructor(s): D. Guillery; M. Nussbaum Terms Offered: Autumn Spring Winter
Prerequisite(s): Students are admitted by permission of the two instructors. They should submit a c.v. and a statement (reasons for interest in the course, relevant background in law and/or philosophy) to the instructors by e-mail by September 20. Ph.D. students in Philosophy and Political Theory and law students do not need permission.

PHIL 51210. Literature of the Shoah, Philosophy in the Shoah. 100 Units.
This seminar will focus on three authors—Charlotte Delbo, Primo Levi, and Zalman Gradowski—each of whom wrote a literary masterpiece about their experiences in Auschwitz. All of their works also raise profound philosophical questions. Delbo, a member of the French Resistance, was deported to Auschwitz and wrote a truly remarkable trilogy, Auschwitz and After, that makes use of a variety of literary genres. Levi, deported as a Jew, wrote two classic prose works, If This is a Man and The Drowned and the Saved. Gradowski, the least well known of these authors, was assigned to the Sonderkommando in Auschwitz. Before being murdered, he wrote two extraordinary manuscripts and buried them under the ashes of Birkenau, where they were discovered after the war. Delbo and Levi both exist in English translation. However, there is not yet a complete translation of Gradowski into English. (His manuscripts were written in Yiddish). We will read the superb French translation of his manuscripts, which is accompanied by an important critical apparatus. Reading knowledge of French is therefore a prerequisite for this course. A central concern of this seminar will be the relation between literary expression and philosophical insight. We will also take up the question of how the Shoah can be represented and what philosophy can say about it. Finally, we will consider writing as a form of ethical and political resistance. We will read these works from several perspectives.
Instructor(s): A. Davidson Terms Offered: Winter
Prerequisite(s): All students interested in enrolling in this course should send an application to jbarbaro@uchicago.edu by 12/13/2019. Applications should be no longer than one page and should include name, email address, phone number, and department or committee. Applicants should briefly describe their background and explain their interest in, and their reasons for applying to, this course.

Equivalent Course(s): HIJD 51210, DVPR 51210, CMLT 51210, FRÉN 41201, ITAL 41201, RLVC 51210
PHIL 51489. The Philosophy of Elizabeth Anscombe. 100 Units.
One of the most important English philosophers of her generation, G. E. M. Anscombe (1919-2001) was a colorful figure who drove her seven children around in a retired London taxi cab, wore a monocle, smoked cigars, and was fond of swearing in her famously mellifluous voice. She brought Ludwig Wittgenstein to public knowledge with her translations of his later works-crucially, Philosophical Investigations (1953). She almost single-handedly invented contemporary action theory with her 1957 monograph, Intention, and changed the course of 20th century Anglophone ethics with her seminal essay, ‘Modern Moral Philosophy’ in 1958. She made important, controversial contributions to a wide variety of topics in philosophy of mind, metaphysics, and philosophy of language. In this seminar, we will read, talk, write, and think about Anscombe’s philosophical work.
Instructor(s): C. Vogler Terms Offered: Spring

PHIL 51701. Conceptions of Nature in German Idealism. 100 Units.
Philosophical conceptions of nature as developed by Kant and some of the major subsequent thinkers - Schelling and Hegel in particular - share three characteristics which make them alien to how philosophers nowadays tend to think about nature: (1) According to Kant, Schelling and Hegel there is such a thing as a philosophy of nature properly speaking, i.e. a kind of philosophical engagement with nature that does not as such amount to philosophy of natural science. (2) Philosophical knowledge of nature cannot, however, be gained by directly taking nature as a topic. It can only be achieved subsequent to an investigation into the form of cognition as such. (3) While philosophical investigation can teach us something about nature that can only be known philosophically, philosophy of nature must nevertheless take natural science seriously, i.e. it must both clarify how empirical science of nature is possible and take precaution not to contradict anything that is known, empirically, about nature. Against this background, we will deal with three main questions: We will first ask for how the transition from a broadly (epistemo-)logical investigation into the form of cognition to the philosophy of nature as it occurs in the works of Kant and Hegel is to be understood. We will then inquire into their conception of the proper method of a philosophy of nature by looking at how they introduce the very first categories of nature - space, time, matter, and motion. We will finally address.
Instructor(s): Christian Martin Terms Offered: Winter. Course will be taught Winter 2020
Prerequisite(s): Open to upper level undergrads
Equivalent Course(s): GRMN 41701, SCTH 41701

PHIL 51816. How Do We Do Critical Political Philosophy? 100 Units.
Political philosophy is always of its time, yet many political philosophies have tried to be deeply critical of their times. The seminar will investigate different ways to justify such criticism. We will look first at Rousseau and the young Marx, and then turn to recent writers such as Rawls, Walzer, Anderson, Waldron, Horkheimer/Adorno and Jaeggi. (I)
Instructor(s): D. Brudney Terms Offered: Winter

PHIL 51822. Political French Liberalism. 100 Units.
It is often said in contemporary literature that the difference between different types of democracies, like democratic Republic and Constitutional Monarchy, is a superficial one compared to the true relevant divide of modernity between democratic societies and non-democratic societies. The problem with such a divide is that it entails the reduction of Modern Constitutional Monarchies to decorative regimes - in other words to a variety of Republic. The goal of our seminar is to go back to the French post-revolutionary period in order to examine what has been called the « British moment » of the French Intellectual History because of its quest for the foundation of a Liberal and Constitutional Monarchy in France. That period deals with the difficult intellectual challenge for French thinkers to overcome Absolutism in favor of Democracy without rejecting Monarchy as such. The « British moment » of the French Intellectual History represents then a transitional - and mostly forgotten -moment between the old regime and the contemporary French Republic. Such a particular moment of French History can be decomposed into three main sub-moments and opens three main intellectual, historical and philosophical sequences: 1789 and the debates about the role of the Monarch in the context of « Popular Sovereignty ». The important thinkers of that period we are going to read are J. Necker and Madame de Staël and (some of) Rousseau.
Instructor(s): R. Moati Terms Offered: Autumn

PHIL 52961. Topics in Epistemology. 100 Units.
This course will cover a variety of topics at the intersection of epistemology and the philosophy of language. Some possible topics: the relationship partial belief and full belief; self-locating belief; what it is to believe (or know) that something might be the case or that something must be the case; probabilities of conditionals and conditional probabilities. (III)
Instructor(s): G. Schultheis Terms Offered: Spring
PHIL 53021. Knowledge of Agency. 100 Units.
The title of this course is ambiguous. It might be thought to refer, either, to the knowledge of which the agent is the object, or, alternatively, to the knowledge of which the agent is the subject. This course will consider how these two forms of knowledge are related to each other. Its guiding conjecture will be that the knowledge of which the agent is the subject is prior in the order of understanding to that of which the agent is the object. After considering Ryle's account of 'knowledge-how' and Anscombe's investigation of the reason-requesting question 'Why?', we will widen our focus to consider the general tendency of analytic philosophers to theorize human agency in terms of the way that agency is explained, rather than from the standpoint of the agent in the midst of action. This research seminar will presuppose some familiarity with the philosophy of action. (III)
Instructor(s): A. Ford Terms Offered: Winter

PHIL 53003. Explanation. 100 Units.
This course surveys recent work on explanation across philosophical disciplines. Beginning with classic accounts of scientific explanation we will proceed to consider recent work on mechanical explanation, mathematical explanation, causal explanation (particularly in the physical and social sciences), the relation between explanation and understanding, and metaphysical explanation (particularly the idea of explanation as ground). (II)
Instructor(s): T. Pashby Terms Offered: Spring
Equivalent Course(s): CHSS 53003, KNOW 53003

PHIL 53451. Perception and Self-Consciousness. 100 Units.
In the first part of the course, we'll be discussing an argument to the effect that: in order for radical skepticism about empirical knowledge not to be intellectually obligatory, we must understand ourselves as enjoying a very particular kind of self-consciousness. In the remainder of the course, we'll be trying to get into view what an adequate account of that sort of self-consciousness might look like. (III)
Instructor(s): D. Finkelstein Terms Offered: Autumn

PHIL 54602. The Analytic Tradition. 100 Units.
This seminar will be a graduate survey course on the history of the first half of the analytic philosophical tradition. The course will aim to provide an overview of developments within this tradition, starting from the publication of Frege's Begriffsschrift in 1879 and reaching up to the publication of Ryle's The Concept of Mind in 1949 and the posthumous publication of Wittgenstein's Philosophical Investigations in 1953. The course will focus on four aspects of this period in the history of analytic philosophy: (1) its initial founding phase, as inaugurated in the early seminal writings of Gottlob Frege, G. E. Moore, Bertrand Russell, as well as Ludwig Wittgenstein's Tractatus; (2) the inheritance and reshaping of some of the central ideas of the founders of analytic philosophy at the hands of the members of the Vienna Circle and their critics, especially as developed in the writings of Otto Neurath, Rudolf Carnap, Moritz Schlick, and W. V. O. Quine, (3) the cross-fertilization of the analytic and Kantian traditions in philosophy and the resulting initiation of a new form of analytic Kantianism, as found in the work of some of the logical positivists, as well as in the writings of some of their main critics, such as C. I. Lewis; (4) the movement of Ordinary Language Philosophy and Oxford Analysis, with a special focus on the writings of Gilbert Ryle and the later Wittgenstein. (V)
Instructor(s): J. Conant Terms Offered: Spring

PHIL 55421. Plato's Timaeus. 100 Units.
The Timaeus is one of Plato's most influential dialogues, and it is also unusual in several respects. The bulk of the work is taken up with a single speech about the origin of the cosmos and the place of human beings within it. The dialogue contains the only discussion in the entire Platonic corpus of numerous topics, including the structure of elemental bodies and the mechanics of sense perception. It is also an important source for understanding Platonic moral psychology, metaphysics, epistemology, and philosophical methodology. In this course, we will study the dialogue closely, focusing on particular topics and sections of the dialogue each week. We will also aim of understand the structure and central argument of the dialogue as a whole. (IV)
Instructor(s): E. Fletcher Terms Offered: Spring

PHIL 55110. Reading Religion from a Philosophical Point of View. 100 Units.
We will examine the question of what it means to read religious texts and practices from a philosophical point of view.
Instructor(s): A. Davidson Terms Offered: Autumn
Prerequisite(s): Enrollment requires the consent of the instructor and the course is only open to advanced graduate students who are writing a thesis or preparing comprehensive exams. For more information contact the instructor.
Equivalent Course(s): DVPR 55110
PHIL 55510. Knowing How. 100 Units.
In ‘Knowing How and Knowing That’ (1945) and The Concept of Mind (1951), Gilbert Ryle famously argued for a sharp distinction between practical and propositional knowledge. This distinction was settled philosophical orthodoxy for several decades, but has more recently come under attack, beginning with Jason Stanley and Timothy Williamson’s ‘Knowing How’ (2001). Responses to their arguments have spawned a rich literature, from replies by such authors as Alva Noe, and Ian Rumfitt, to Stanley’s full presentation of their view in his book Know How (2011), to further discussions by authors such as Kieran Setiya, Jennifer Hornsby, Carlotta Pavese, Ellen Fridland, Julia Annas, and many others. This course will delve into this literature, beginning with a careful reading of Ryle, and then turning to a discussion of Stanley and Williamson, their allies, their critics, and recent developments. This is a state of the art seminar on a topic of great current scholarly interest. (III)
Instructor(s): M. Kremer Terms Offered: Spring

PHIL 55912. Aristotle and Marx. 100 Units.
In the preface to the first edition of Capital, Marx describes his theoretical standpoint as one from which ‘the development of the economic formation of society is viewed as a process of natural history.’ With a view to understanding Marx’s theoretical standpoint we will ‘go back,’ in Marx’s words, ‘to the great investigator who was the first to analyze the value-form, like so many other forms of thought, society and nature. I mean Aristotle.’ Aristotle’s influence on Marx is well-known and frequently attested by Marx himself. We will explore that influence as it manifests itself in Marx’s views on a variety of topics-e.g. on human nature and history; on labor, leisure and the good life; on slavery and freedom; on value and exchange; on property and wealth; on justice; and on alienation.
Instructor(s): A. Ford Terms Offered: Autumn

PHIL 57200. Spinoza’s Ethics. 100 Units.
An in-depth study of Benedict Spinoza’s major work, the Ethics, supplemented by an investigation of some of his early writings and letters. Focus on Spinoza’s geometric method, the meaning of and arguments for his substance monism, his doctrine of parallelism, and his account of the good life. (V)
Instructor(s): D. Moerner Terms Offered: Spring
Prerequisite(s): 200: History of PHIL II, or equivalent.

PHIL 57504. Kant’s Critique of Judgment. 100 Units.
This will be a study of Kant’s third and final Critique, his Critique of Judgment. We will attempt to survey the book as a whole, including Kant’s influential account of the nature of judgments of beauty and sublimity, as well as his theory of ‘teleological’ judgment and its place in our understanding of the natural world. We will also seek to comprehend and assess Kant’s claim that these studies constitute essential contributions to a critique of our cognitive power of judgment, a critique which is crucial to the completion of his larger ‘critical’ project surveying the scope and limits of human cognition as a whole. (V)
Instructor(s): M. Boyle Terms Offered: Winter
Prerequisite(s): Graduate Students from Other Departments Must Have Instructor’s Consent to Enroll.
Equivalent Course(s): SCTH 57504

PHIL 58010. Philosophy of Language. 100 Units.
A seminar on contemporary issues in philosophy of language and linguistics. The exact topic will be determined closer to the date and in light of students’ interests. The list of topics discussed in the past include indexicality, subjectivity, game theory, and conditionals. (II)
